Applying For: Web Application Developer

PROFESSIONAL SUMMARY

Full-stack web developer with 1.5 years of production experience building and deploying scalable banking and university web applications. Skilled in ASP.NET Core, C#, RESTful APIs, PostgreSQL, and AWS cloud services (ECS, S3, RDS). Experienced in microservices architecture, Docker containerization, and UAT deployment cycles in a real banking environment at J Trust Royal Bank. Maintainer of 57+ public repositories on GitHub (github.com/vertsan), documenting 3 years of continuous self-learning across diverse stacks. Strong focus on code quality, security, and cross-functional team collaboration.

EDUCATION BACKGROUNDS

2022 – Present

Bachelor of Computer Science, Expected Graduation: 2026

Samdech Preah Mahasangharajah Bour Kry University

OCCUPATION

2025 – Present

Intern – Web Application Developer (Full Time)

J Trust Royal Bank

- Built and shipped features for the Product Referral and DAD App Center – two internal banking tools used daily by 500+ bank staff across the organization.

- Developed full-stack web features using ASP.NET Core MVC, C#, RESTful APIs, and PostgreSQL — building, optimizing, and maintaining database schemas for production banking systems.
- Applied microservices architecture and containerization using Docker and Kubernetes, and deployed applications to AWS ECS environments — supporting monitoring and production stability.
- Performed code reviews and participated in UAT deployment cycles, identifying and resolving pre-release issues — contributing to measurable improvements in application performance, stability, and load time.
- Collaborated closely with cross-functional teams — Design, QA, and DevOps — using Git/GitHub for version control, following code quality, performance, and security best practices.

2025 – Present

Full Stack Developer (Part-Time)

Samdech Preah Mahasangharajah Bour Kry University

- Designed and built the SBKU Attendance Management System end-to-end, serving students and staff across the university.
- Developed the mobile app frontend in Flutter and the backend in Laravel (Livewire), handling authentication, attendance logic, and data storage.
- Managed development tasks and sprint workflows using Jira, ensuring timely delivery of features.

2024 – 2025

Web Application Developer (Part-Time)

Samdech Preah Mahasangharajah Bour Kry University

- Redesigned and enhanced the official university website (sbku.edu.kh), improving navigation and overall user experience.
- Built custom CMS features using Filament (Laravel), enabling staff to publish and manage content dynamically without developer involvement.
- Deployed and maintained the application on cPanel hosting.

2023 – 2024

IT-Support and Digital Marketing (Full-Time)

Bright Kids School

- Produced marketing materials (posters, banners, social media graphics, and event videos) using Adobe Photoshop and Premiere Pro.
- Managed the school's social media visual identity, ensuring consistent branding across digital and print channels.
- Provided first-line IT support for teachers and staff, resolving hardware, software, and connectivity issues.

2023 – 2025

ICT Teacher & Computer Maintenance (Part-time)

Phnom Penh International Standard Academy

- Taught Microsoft Office courses including Word, Excel, PowerPoint, Outlook, and Teams to students at all skill levels.
- Guided students on using AI tools effectively in real-world work, and covered cybersecurity fundamentals including email security, data protection, and safe online practices.
- Introduced students to Google Workspace tools (Forms, Meet) and Zoom for online collaboration and remote learning.
- Provided helpdesk support and computer maintenance, assisting students with software installation and troubleshooting technical issues.

2022 – 2023

Graphic Designer (Full-Time)

AddMii Startup Company

- Designed digital card visuals, marketing materials, and social media assets for a startup product launch.
- Created brand-consistent graphics using Adobe Photoshop and Illustrator, covering print and digital formats.
- Developed visual concepts for campaigns and digital promotions, contributing to the startup's early brand identity.

PROJECT

SBKU APP | [LINK](#)

- Developed and maintained the SBKU Attendance Management System — serving 500+ students and staff with daily attendance tracking.

- Built the mobile frontend using Flutter.
- Developed the backend with Laravel (Livewire) for application logic and data handling.
- Optimized system performance, usability, and reliability for high-frequency daily usage.
- Managed tasks and workflows using Jira.

Microservice Ecommerce | [LINK](#)

- Developed a full microservices-based e-commerce platform using **Turborepo**, **Express.js**, **Fastify**, **Hono**, **Kafka**, **Prisma**, and **Stripe** for payments.
- Implemented role-based authentication, API gateways, and Kafka event-driven communication across product, order, and payment services.
- Built an integrated **Next.js** storefront and an Admin Panel for managing users, orders, and products.

Building UI Admin Dashboard | [LINK](#)

- Built a UI admin dashboard to enhance skills using the **Shadcn UI** library, **Next.js**, **React.js**, **Zustand**, and **Zod** for validation.
- Implemented state management, reusable UI components, and form handling with **react-hook-form**.

Clone UI Iphone 15 Pro Max Website | [LINK](#)

- Created a pixel-perfect clone of Apple's iPhone website using **Next.js**, **GSAP**, and **Framer Motion**.

Traveler Website | [LINK](#)

- Built a simple website with HTML, CSS that based on the framework of CSS is Bootstrap 5.

Product Management System | [LINK](#)

- Build mini system for managing home business to CRUD products for comprehensive, productivity and comfortable using Nextjs and Vercel.
- The Database stored in the **Blob Store** is Open source from microservice of **Vercel**.

POS System | [LINK](#)

- Built a full-featured Point of Sale desktop application in C# (.NET 8 / WinForms) with product management, sales transactions, and reporting modules.
- Demonstrates strong C# fundamentals directly relevant to ASP.NET Core and enterprise banking application development.

Awwwards Clone | [LINK](#)

- Recreated an award-winning web design site using JavaScript, GSAP animations, and advanced CSS techniques to master modern frontend motion and UI craftsmanship.

- Part of a self-directed learning journey (2023–2026) building 57+ repositories on GitHub — spanning HTML/CSS, JavaScript, React, Next.js, Laravel, Flutter, C#, and cloud-native applications.

CORE SKILL

- **Language:** JavaScript, TypeScript, C#, PHP, Python, Dart
- **Frontend:** HTML5, CSS3, React.js, Next.js, Vue.js, Flutter, Blazor, Razor (ASP.NET)
- **Backend:** ASP.NET Core, Node.js, Express.js, Laravel (Livewire), PostgreSQL, SQL Server, Prisma ORM
- **Dev Tools:** Git/GitHub, Vercel, Firebase, Cloudflare, cPanel, CI/CD (GitHub Actions)
- **Cloud & DevOps:** AWS (ECS, EC2, S3, RDS, Fargate), Docker, Kubernetes, GitHub Actions
- **Design & Tools:** Figma, Adobe Photoshop, Adobe Illustrator, UI/UX Wireframing
- **Task Management:** Jira, OpenProject, GitLab
- **CMS Technologies:** Filament, Sanity, Strapi, WordPress
- **Microservice:** Kafka, Stripe, Hono, Fastify, Turborepo
- **CI/CD Automation:** GitHub Actions
